

FROM BENCH TO BULK

Designed Around Your Process

Whether you require grams for research, kilograms for process development, or metric tons for commercial manufacturing, Ascensus helps customers scale chemistry with confidence. Our Bench to Bulk approach is designed to provide continuity, flexibility, and support throughout the product lifecycle.

Through the combined capabilities of Strem Catalog, WyChem, Callery, and the broader Ascensus manufacturing network, we provide a flexible pathway from bench-scale development to commercial supply while supporting customer-specific quality, regulatory, procurement, and change-control requirements.

Bench to Bulk helps connect research-scale material access with commercial manufacturing capabilities, reducing potential friction as programs move from development to scale-up and production.

Bench

Specialty reagents
& chemistry

DEVELOP

Custom synthesis &
process development

SCALE

Scale-up &
manufacturing expertise

BULK

Reliable specialty
chemical supply

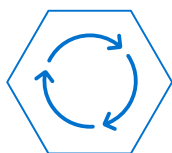

One chemistry partner.
Consistent quality. Uninterrupted progress.

DESIGNED TO FIT YOUR REALITY

Customer requirements vary. Our Bench to Bulk approach is built to work within your processes and support the path that is right for your project.

CONTINUITY FROM BENCH TO BULK

For materials that can be produced at the same site across different volumes, customers can continue with that manufacturing source as their project moves from development into production.

CHANGE CONTROL, CONSIDERED

For materials that begin at Strem and move to a commercial manufacturing site, the transition can involve customer qualification, documentation and change-control requirements. The timing and level of this work will depend on the customer's processes and those of their end customers.

PLANNING FOR COMMERCIAL SCALE

When a customer has requirements that make a manufacturing site change difficult, the commercial manufacturing path can be considered earlier in the project. Planning can also account for REACH registrations, global warehousing capabilities, logistics requirements, and long-term supply strategies needed to support reliable commercial supply.

WORKING WITH YOUR REQUIREMENTS

Strem, Wychem, and Callery provide different capabilities within the Ascensus Specialties network. The appropriate path can be determined based on the material, required volume, manufacturing capabilities and the customer's quality, regulatory and procurement requirements.

We work to adapt our pathway to the customer's quality, regulatory, procurement, and change-control requirements whenever possible.

THREE BRANDS. ONE NETWORK. MORE WAYS TO SUPPORT YOU.

Strem, Wychem, and Callery offer complementary capabilities. Together, we provide solutions that can be matched to your chemistry, volume requirements, and operational needs.

STREM

Research & Development Supply

- Broad portfolio of specialty reagents and fine chemicals
- High-purity catalysts, ligands, and organometallics
- Research and development support
- Laboratory quantities from milligrams to kilograms
- Rapid access to materials for early-stage evaluation

WYCHEM

Custom Chemistry & Scale-Up

- Specialty organic building blocks and intermediates
- Custom synthesis and process development
- Pilot-scale and commercial manufacturing
- Kilogram to metric-ton supply options
- Manufacturing expertise from development through production

CALLERY

Specialty Chemicals & Materials

- Boranes, borohydrides, and specialty alcoholates
- Boron-based reagents and alkali metal technologies
- Back-integrated manufacturing capabilities
- Safe handling of reactive and pyrophoric materials
- Supply from kilograms to multi-metric tons

One Chemistry Partner. Multiple Pathways to Scale.

Working together across the Ascensus Specialties network to help you move your chemistry forward.

CHEMISTRY MADE FOR WHAT MATTERS

Ascensus Specialties combines deep chemistry expertise, advanced manufacturing, and a commitment to quality to deliver solutions that meet today's challenges and tomorrow's opportunities.

60+ YEARS
OF EXPERIENCE

SUPERIOR
PERFORMANCE

& ROBUSTNESS

SAFETY
FOCUS

Headquartered in Evans City, PA, Ascensus Specialties is a global leader in catalysts, ligands, building blocks, and specialty reagents. Our 60+ years of synthetic knowhow, allows us to bring additional value to our clients through our custom synthesis and GMP services. From world-class manufacturing facilities in Elma, WA, Evans City, PA, Newburyport, MA, and Cambridge, UK, Ascensus has a global reach that ensures our clients can consistently manufacture their products to the highest standards.

THE ASCENSUS ADVANTAGE

60+ Years of Experience

Custom-Tailored Purity and Impurity Profiles

Commercial GMP Capabilities

Dependable Global Supply Chain

Process Control and Robustness

Customer Focused Service
